Meeting records 📄 Transcript

Summary

Project development timelines and product integration strategies were aligned with core branding and infrastructure optimization goals.

Product Integration and Strategy

Participants established a unified product ecosystem under the Atlas brand to target small and medium businesses. They decided that software must function as an integrated suite while remaining capable of independent operation.

Development and Infrastructure

Technical planning prioritized HIPAA compliance for the AI phone receptionist and cost optimization through local model usage. Infrastructure upgrades include migrating to high-capacity storage systems for improved data management.

Operational and Legal Framework

Intellectual property agreements were prioritized to distinguish between client and corporate ownership. Backend accounting needs are now managed through a new partnership with a certified public accountant firm.

Decisions

Aligned

- **Target market limited to SMBs and SMEs** The company will exclusively target Small and Medium Businesses (SMBs) and SMMES for the initial launch phase.
- **Niche defined as small/medium business modernization** The primary business niche is established as helping small and medium businesses upgrade to 21st-century AI and automation technology.
- **Cross-selling strategy across product ecosystem** The company will implement a cross-selling strategy where customers are made aware of and offered the full suite of integrated products.
- **AI phone receptionist included in sales pitch** The AI phone receptionist will be included in the sales pitch during the Atlas launch, even if the service is not fully ready.
- **Father-in-law business used for onboarding pilot** The company will use the father-in-law's business as a pilot test case to define and refine the standard client onboarding and setup process.
- **Infrastructure strategy for local and cloud models** Product infrastructure is set to use local Mac Studio hosting for Open Claw and traditional cloud models for Atlas products.
- **Cost-optimized AI model selection strategy** The AI model selection strategy will prioritize cost-effective models like DeepSeek for general tasks, reserving high-end models for complex, high-priority needs.
- **Atlas product naming standardization adopted** All products will be standardized under the 'Atlas' brand (e.g., Atlas Engine, Atlas Phone Receptionist) to form a unified ecosystem.
- **IP ownership framework and agreement structure** Intellectual Property will be structured so that internal work is owned by Atlas (C-Corp) and client work is held by the agency until final payment, at which point ownership transfers.
- **C-Corp entity structure for equity distribution** The Atlas entity is structured as a C-Corp to facilitate future equity ownership participation.

We've **updated the Decisions section** using your feedback.

Let us know what you think: [Helpful](#) or [Not Helpful](#)

Next steps

- ☐ [Wajid Ali Shah] Provide Twilio Guide: Provide a document explaining the process for updating the Twilio account.
- ☐ [MRE Consulting & Insurance] Update Twilio: Start updating the Twilio account once the instructional document is received.
- ☐ [Wajid Ali Shah] Update Website: Update the website with the changes suggested by the father-in-law regarding the wording on the M_C_A_I website.
- ☐ [Wajid Ali Shah] Sign IP Agreements: Sign and return the I_P agreements concerning personal and client work ownership.
- ☐ [Wajid Ali Shah] Complete Open Claw: Complete the Open Claw project development within 7 working days.
- ☐ [MRE Consulting & Insurance] Remove Hostinger Instance: Remove the Open Claw instance currently on Hostinger.
- ☐ [MRE Consulting & Insurance] Share Account Credentials: Share the email account passwords and disable two-factor authentication for the setup process.
- ☐ [MRE Consulting & Insurance] Send Credentials: Transmit email passwords and Learning Management System login information. Provide these details once the migration process on the Mac Studio concludes.
- ☐ [The group] Schedule Follow-up: Arrange a meeting for tomorrow to discuss business objectives.

Details

- **AI Phone Receptionist Development and Compliance:** Wajid Ali Shah stated that the development, testing, and deployment of the AI phone receptionist will require at least two months. They emphasized that the system must strictly adhere to Health Insurance Portability and Accountability Act (HIPAA) compliance standards to prevent data leakage ([00:01:13](#)).
- **Twilio Account Updates:** Wajid Ali Shah will provide a document to MRE Consulting & Insurance with instructions for updating their Twilio account, which is a necessary step to facilitate the registration of individual client brands and enable future service offerings ([00:02:30](#)).
- **Project Quote Justification:** Wajid Ali Shah explained that the increase in the project quote was due to the inclusion of numerous new features specified in the version 3 document, noting that the mobile application component involved a broader scope of work than originally anticipated ([00:03:51](#)).
- **AI Phone Receptionist Market Potential:** MRE Consulting & Insurance and Wajid Ali Shah discussed the economic viability of the AI phone receptionist, noting that it could replace human labor costs—estimated at \$30,000 to \$40,000 annually—with a service cost of approximately \$200 to \$300 per month, while providing 24/7 availability and handling multiple concurrent calls ([00:06:04](#)).
- **Product Ecosystem Design:** The participants agreed that while all software products should be designed to function as an integrated suite, they must also be capable of operating independently to meet the specific needs of different clients ([00:07:15](#)). MRE Consulting & Insurance defined the core product suite to include Atlas, the Lead Enrichment System (ALES), the AI phone receptionist, the Customer Relationship Management (CRM) system, and a social media poster ([00:09:23](#)).
- **Target Market Strategy:** Both participants agreed to focus on Small and Medium Businesses (SMBs) and Small and Medium Marketing Enterprises (SMMEs) as the primary target market, aiming to help these entities integrate AI and automation into their operations ([00:11:26](#)).
- **Cross-Selling and Marketing Approach:** The strategy involves cross-promoting products through trial periods and bundled promotions to

increase the value of each client relationship ([00:14:40](#)). MRE Consulting & Insurance also noted the acquisition of additional domains, such as atlas.store, to support a potential online retail presence ([00:15:32](#)).

- **Launch and Testing Timeline:** Wajid Ali Shah intends to have a beta version of the AI phone receptionist ready for internal testing by September 1st, utilizing the knowledge base of MRE Consulting & Insurance ([00:18:36](#)).
- **Onboarding and Client Education:** MRE Consulting & Insurance plans to use the initial setup for their father-in-law's business as a test case to refine the onboarding, setup, and customization processes ([00:22:23](#)). To support client adoption, they intend to create standard operating procedures, frequently asked questions (FAQs), and instructional videos ([00:24:22](#)).
- **Business Operations and Partnerships:** MRE Consulting & Insurance confirmed they have entered into a partnership with a Certified Public Accountant (CPA) firm to manage backend accounting and tax operations ([00:25:22](#)).
- **Open Claw and Life Management System Setup:** MRE Consulting & Insurance is moving their digital infrastructure to a Mac Studio, utilizing Thunderbolt 5 external hard drive enclosures with a 12-terabyte RAID configuration for data management ([00:26:35](#)). The goal for the Life Management System is to simplify its scope to focus on managing business operations, personal communications, and scheduling ([00:27:47](#)).
- **Technical Infrastructure and Cost Optimization:** Wajid Ali Shah advised using local models for the Open Claw system, while reserving high-performance cloud models like OpenAI and Anthropic for complex, high-priority tasks ([00:31:21](#)). They discussed utilizing more cost-effective models, such as DeepSeek, Gemma, and Quinn, for other system functions to reduce expenses ([00:32:18](#)).
- **Branding Strategy:** MRE Consulting & Insurance proposed rebranding all products under the "Atlas" name—for example, "Atlas Engine" for lead generation and "Atlas Phone Receptionist"—to create a unified brand identity for the product ecosystem ([00:35:35](#)).
- **Legal and IP Protection:** MRE Consulting & Insurance is formalizing an intellectual property agreement with Wajid Ali Shah and Nova Edge Solutions to ensure that work performed for personal projects is owned by the Atlas

corporation, while work performed for clients remains under client ownership upon final payment ([00:37:56](#)).

- **Open Claw Completion:** Wajid Ali Shah committed to completing the Open Claw project within seven working days and advised MRE Consulting & Insurance to remove the existing Hostinger hosting setup ([00:39:52](#)).
- **Access and Credentials:** MRE Consulting & Insurance will provide the necessary email passwords and disable Two-Factor Authentication (2FA) to streamline the developer's access during the setup process ([00:40:36](#)).

Tech Meeting - Transcript

00:01:13

Wajid Ali Shah: Hello.

MRE Consulting & Insurance: Hi, how are you?

Wajid Ali Shah: I am fine. How are you?

MRE Consulting & Insurance: I'm doing very well, thank you.

Wajid Ali Shah: How are you?

MRE Consulting & Insurance: So, um, yeah. So, I wanted to talk to you about a few different things. Is now still a good time?

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: Okay. So, um in terms of um in terms of um in terms of uh essentially um the AI phone receptionist um

Wajid Ali Shah: Yeah,

MRE Consulting & Insurance: so so you anticipate that taking how long to build.

Wajid Ali Shah: will take at least two months to fully build, test and you know uh deploy it. we need to be compliant to a few uh different things right like we have to be compliant

MRE Consulting & Insurance: Okay.

Wajid Ali Shah: with HIPPA and a few other things so I'll need to make sure that everything is compliant and we not uh there is no data leakage or anything like that because I I

00:02:30

MRE Consulting & Insurance: Gotcha.

Wajid Ali Shah: have and and we'll also need uh a new an updated uh Twilio account so that is going to take some time as well So by the time that that is approved uh we'll be uh you know at least more than halfway uh done with development and then uh we can use that Atlas will will also need to have that the same uh the same updated and we'll need to use the same updated account.

MRE Consulting & Insurance: So,

Wajid Ali Shah: Uh because Yeah.

MRE Consulting & Insurance: should I should I start updating the Twilio account now?

Wajid Ali Shah: Yeah. You should start it as soon as

MRE Consulting & Insurance: Can you can you give me a document basically explaining what I have to do

Wajid Ali Shah: possible.

MRE Consulting & Insurance: and then I'll look into how to do it?

Wajid Ali Shah: Yeah, sure. I I'll send that to you tomorrow.

MRE Consulting & Insurance: Okay.

Wajid Ali Shah: Yeah. because there if if you do that then we'll be able to give for example if if Francis wants to uh buy the AI receipt or wants to buy messaging and uh emailing through us then you can uh just give register his brand instead of having it having the messages go through your brand his his brand will be registered but he will be under MCI but uh he'll have his own separate brand right and we can will be able to do that for for people who want to use Atlas

00:03:51

MRE Consulting & Insurance: Right.

Wajid Ali Shah: uh uh people who want to buy AI receptionist, people who want to buy the social media account manager and all that stuff as well.

MRE Consulting & Insurance: Got it. Okay. Um,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: now in regards to the in regards to the um the quote that you gave me, so I was just curious what made it jump so much higher than what we agreed to after the second

Wajid Ali Shah: the there were a lot a lot more new features that were included

MRE Consulting & Insurance: time.

Wajid Ali Shah: in uh in the the the feature document that you gave me the V3 one the version 3 one so it I thought I even thought that the mobile phone

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: uh the mobile app was going to be a simple one there but it also has a lot a lot of new features then there are a few more other features as well that were included so you know this isn't even high if I had to give the actual amount it would be like two or three times more that I would judge anyone

00:05:03

MRE Consulting & Insurance: got it.

Wajid Ali Shah: else

MRE Consulting & Insurance: Okay. Um, so then what I think we should do,

Wajid Ali Shah: yeah

MRE Consulting & Insurance: what I think the best way to do it is obviously we're going to build it no matter what. Um, so what we can do is just try to spread out the payments as much as we can so that way we can start bringing in revenue anywhere else just to help pay for

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: it. Um, and then that's fine. Um,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: but I do think, and I've been talking to a lot of people about this, I really do believe that the AI phone receptionist could be just as big, if not

bigger, for us than the than Atlas because so many businesses are going to eventually Stop. heart to want to use this

Wajid Ali Shah: Yeah, I mean it is it is a lot cheaper.

MRE Consulting & Insurance: service.

00:06:04

Wajid Ali Shah: I I have also done a lot of research like uh even you know a part-time receptionist cost around 30 to what 30 to 30 to \$40,000 per year. And this could less this could be like \$200 or \$300 per month.

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: And they could have a lot more features. the the the receptionist will be available 24/7. They could handle like 10 calls concurrently and there are so many other features and and every every business needs a receptionist. Even individual like for example uh freelancers and uh people who work remotely or stuff like that they could even use something like that.

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: It is it is limited to

MRE Consulting & Insurance: I mean I mean the thing is yeah essentially the thing is what what's gonna happen is basically everybody's gonna start using it from the big guys to the little guys and the little guys are going to use it to replace labor and the big guys are going to

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: use it to reduce labor costs and catch leads out of operating hours and but but my the way I foresee it is that everybody's going to adopt it.

00:07:15

Wajid Ali Shah: Yeah. I think every small business needs a receptionist anyway.

MRE Consulting & Insurance: So,

Wajid Ali Shah: So instead of paying someone

MRE Consulting & Insurance: and by the way, and by the way, not not forget about the receptionist part, just about it recording the calls,

Wajid Ali Shah: \$34,000.

MRE Consulting & Insurance: giving you a transcript, giving you a summary, connecting it to their CRM, followups, you know, putting events on the calendar, you know, all that stuff from a from a phone call is very, very helpful, you Oh,

Wajid Ali Shah: Yeah. I mean what I was saying is that this is pretty good but we are also kind of

MRE Consulting & Insurance: and

Wajid Ali Shah: giving a lot a lot of features right some feature that should be included in the in the in the OS like in the AI OS or automation OS for a business we are including all of that in just the receptionist

MRE Consulting & Insurance: so so here's here's the thing. Basically, all of our systems are going to work together,

Wajid Ali Shah: Mhm.

00:08:16

MRE Consulting & Insurance: right? And they're all built to work with each other, but we also need to build them so that way they could work independently of each other. If businesses want some, if not all of our services, right? So, if somebody is getting Atlas through us and they're getting the phone receptionist, then those services will run through the Atlas part, right? But if a company is coming to us and they're just getting

phone receptionist and they're not getting Atlas from us, then obviously we'll provide them the feature through the AI phone receptionist.

Wajid Ali Shah: Yeah. But there are some differences with uh the receptionist and Atlas like Atlas will actually actively searches for leads and actually actively tries for to tries to gives business to lead. But the way we have designed the receipt reception is that it would only it will only contact leads or only contact people that have already contacted the

MRE Consulting & Insurance: Yeah, exactly.

Wajid Ali Shah: business.

MRE Consulting & Insurance: No, and that and that's how it's supposed to be.

00:09:23

MRE Consulting & Insurance: It's only supposed to be meant to pretty much answer phones and then just send up like follow-ups like, "Okay, I want to confirm that you're scheduled for an appointment on Thursday at 2:00." You know what I mean?

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: Like that's very very simple.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: The reaching out to leads and getting business is they they have to get Atlas for that.

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: See what I'm what I'm hoping to do is I'm hoping to build five independent products that I could sell or that we could sell that work together but work separately. Right? So,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: we have Atlas,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: we have the ALES,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: we have the AI phone receptionist,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: we have the CRM, and we have the social media poster, right? So,

Wajid Ali Shah: Yeah.

00:10:21

MRE Consulting & Insurance: those are five separate IP uh products that we could sell separately, but they also obviously all work together.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: But what I'm trying to do is I'm trying to make it be appeal to a broader

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: market. So, the reason that I I took the AI and automation and technology out of the accounting and and tax and whatever stuff is because I want to be able to go after businesses that are already running because there's no reason for \$200 a month that every small business shouldn't have an AI receptionist. I'll guarantee that small businesses lose more in missed calls and leads than they would paying for the AI receptionist, you know. So,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: I think I I think the AI receptionist could be very big on its own. I think that the social media poster could be big on its own.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: I think that the, you know, the CRM could be big on its own.

00:11:26

MRE Consulting & Insurance: And then alto together they're even a better suite of products. But I want to be able to go out and I want to be able to sell every business a different option based on what they need. And at the end of the day, we're providing all the options, you know, like we own all of the options we're providing. And if we do that and we can consistently get customers, we will be okay.

Wajid Ali Shah: Yeah, I was also doing some research about you know how uh we sell Atlas and all the other services and the the and I think that is what I think that we should only target at least for now only SMBs and SMMES instead of you know going for these you know going for individual individual people or or very small businesses or like these big or big businesses we should only target small medium businesses right

MRE Consulting & Insurance: Oh, absolutely.

Wajid Ali Shah: Oh

MRE Consulting & Insurance: That is definitely our target market for launch because that's our easiest sell, right?

00:12:33

Wajid Ali Shah: yeah.

MRE Consulting & Insurance: Those are the people that will get the highest ROI from getting our services.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So,

Wajid Ali Shah: I did a lot of research about that.

MRE Consulting & Insurance: yeah.

Wajid Ali Shah: So, you know,

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: I'll I'll I'll atlas is up and running. I'll share that with you. You probably know about it more than I do, but if it could help, I would share that with you. It may probably help

MRE Consulting & Insurance: Yeah. I mean, so so um I appreciate that.

Wajid Ali Shah: you.

MRE Consulting & Insurance: Yeah. So I've been looking at it, too. So basically what I've been reading a lot about is that when you start a SAS product like we're doing with Atlas, you really want to start with a niche,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: you know.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So what I what I'd like to do and be our niche is helping small and medium businesses upgrade to the 21st century.

00:13:30

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: That

Wajid Ali Shah: I mean they say niches are in the niches you know maybe yeah it will

MRE Consulting & Insurance: simple. Yeah. I mean literally just small and medium businesses implementing AI automation and

Wajid Ali Shah: Look.

MRE Consulting & Insurance: technology in the 21st century. That's it. That's our niche. We're going to provide value and ex and do posts about why an AI phone receptionist helps business and provides an ROI. We're going to provide a thing why Atlas generates leads and you know all these things and we'll reach out to people and all that. But like you know we have five products to sell. So the other thing is if let's say we get someone with for Atlas and they like Atlas then maybe they try the AI phone receptionist right so then so every person we get is a

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: potential cross sale right so like every client can be bigger and bigger and we have five options for people to choose from you know so it's like we have we've given ourselves a good chance at being successful because of the amount of ways is that it could be successful,

00:14:40

Wajid Ali Shah: Yeah, I also uh when I also uh uh thought of or I planned to add

MRE Consulting & Insurance: right?

Wajid Ali Shah: a few little things like if someone buys the AI receptionist and they they will get push notifications about Atlas and Alice and all these other stuff and and and the same Same thing will happen with that list and other sales stuff as well. Like if they open the Atlas dashboard, they will know about the the other projects that uh we have and all that stuff and that will happen for in all the

MRE Consulting & Insurance: Yeah. Oh, I mean once once we're up and running, we're going to be offering promotions like,

Wajid Ali Shah: products.

MRE Consulting & Insurance: you know, if you if you try Atlas and you want to try our AI software, try it for one month free, right? Or whatever.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: And then they they try it and then we get a customer, right? or maybe they started with the AI receptionist and we give them a discount code to try Atlas,

00:15:32

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: whatever it may be. Um, but yeah, definitely we want to cross-sell. I mean,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: anybody who signs up for one product should be made aware of the other products obviously. Um, not right away because we don't want to obviously overwhelm or bombard them. Um, but you know, we definitely want to do that. That's also part of the reason why I don't know if you saw but I got a few extra of the Atlas domains.

Wajid Ali Shah: Yeah, I

MRE Consulting & Insurance: So that way in case we wanted to put like a store together,

Wajid Ali Shah: saw

MRE Consulting & Insurance: I bought the atlas.store in case we wanted to do online. I got Atlas online, whatever it may be. So um you know essentially we can do it however we want. Um, but yeah, we'll definitely be cross marketing and cross-selling and making them known and making bundle prices and stuff.

00:16:28

MRE Consulting & Insurance: Um, I've been doing a lot of research about like all these places to launch AI startups and SAS programs. like there's all these Reddit communities where people will try it and um there's blog posts and there's like all these places that you can spread you know your name and let people see what you've built um and to try to get some you know volume out there because obviously when Atlas is ready we're going to go about it in two ways right we're going to advertise Atlas as a service through MLE consulting agency, but then Atlas itself is going to target clients for Atlas, which could be, you know, um any kind of business, right?

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So, um

Wajid Ali Shah: Would also be able to sell uh it sister products as

MRE Consulting & Insurance: Exactly.

Wajid Ali Shah: well.

MRE Consulting & Insurance: Yeah. Exactly. So, um all of that will be, you know, worked out. I mean, basically, we just have to build a if we build a good product that works well, I think we will be a success because everybody I've spoken to says that they would use this.

00:17:47

MRE Consulting & Insurance: They would pay for this. It's a great idea. Every small business owner is interested in it. I mean, it really is the what what from what it started to what it is now is A big is a big big

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: difference.

Wajid Ali Shah: When we started it was like a simple messaging service, right? it would just generate SMS or email based on

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: AI and more it is like a whole ecosystem in

MRE Consulting & Insurance: Yeah. Yeah. Exactly. I mean and you know like I said look the good thing is because the whole ecosystem is meant to

Wajid Ali Shah: itself

MRE Consulting & Insurance: work together. We have cross sales. Like if this does well and we own it privately and it continues to do well for years, like you're talking about a very good return, you know.

00:18:36

MRE Consulting & Insurance: So, um, so yeah, so I'm I'm really looking forward to launching for Atlas, but I think that it's important for when we launch for Atlas, even if

we're not ready to launch the AI phone receptionist, that we make it part of our sales pitch because I think it's important.

Wajid Ali Shah: Yeah. Yeah. Sure.

MRE Consulting & Insurance: You know what I mean?

Wajid Ali Shah: I have been trying to have a a smaller version completed by next month by 1st of September. But the whole the full system with everything included every fusion included will take us some time to uh fully

MRE Consulting & Insurance: Yeah. Well, remember remember something. So,

Wajid Ali Shah: build

MRE Consulting & Insurance: if if we could just have a working system just for us to test, to practice, to see how it does, you know, whatever, and then we can continue to add and build in features. That's fine. I mean, we're only going to sell the tested, fully built out version to customers, but what we use internally while we're launching for Atlas and everything, we can use a, you know, like a test model that isn't fully built

00:19:48

Wajid Ali Shah: Yeah,

MRE Consulting & Insurance: out.

Wajid Ali Shah: we are going to uh that that is what I was saying that by September I am going to try uh let's say let's say a a beta version of uh the AI receptionist based on

MRE Consulting & Insurance: Oh, okay.

Wajid Ali Shah: the based on the knowledge base of M uh and

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: just like we are going to try just for your business by September 1st hopefully. I'm not giving you an actual date but yeah I think we'll be able to do

MRE Consulting & Insurance: Yeah. Well, so like I I've just been saying September 1st because,

Wajid Ali Shah: that.

MRE Consulting & Insurance: you know, we were talking about the end of August and I just figured that way my wedding is August 22nd. My whole family is going to be here. I'm going to be busy from August 20th until the September 1st. So, I figured why don't we just come back fresh September 1st launch.

00:20:38

MRE Consulting & Insurance: We can start going out there getting everything together um and and making

Wajid Ali Shah: Yeah, by the time you come back at least Atlas and Alice will be ready.

MRE Consulting & Insurance: a

Wajid Ali Shah: They will be fully ready working with each other and ready to you know do their thing. Uh I'll try to have it completed right.

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: I'll try to have it be at as fastpaced as possible. Good. But uh no

MRE Consulting & Insurance: No, listen.

Wajid Ali Shah: guarantees.

MRE Consulting & Insurance: There's no no you never need to have a guarantee. And I don't I don't ever want the quality of the work to be compromised. So, always take whatever time you need in order to um in

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: order to um you know build it properly. Now, uh what I will say though is us advertising that we sell it and it being ready doesn't have to be the same thing, right?

00:21:34

MRE Consulting & Insurance: So like

Wajid Ali Shah: We are going to have a working demo, right? We are going to have a demo by ready for by September 1st which we can use

MRE Consulting & Insurance: yeah,

Wajid Ali Shah: to uh advertise everything.

MRE Consulting & Insurance: yeah. Um so yeah,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: I think that will be good. And then like you know and then the other thing I spoke to you about is um on September 1st after we're done with the testing and setup and going live with Atlas.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: Whatever you tell me I will pay you and you're going to you're going to create a

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: website for my father-in-law and then we're going to

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: set up Atlas to work for him. and test it in in where he lives.

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: So So I what I basically want to do is I want to use him as a test

00:22:23

Wajid Ali Shah: Sure.

MRE Consulting & Insurance: case for let's say somebody hires us, right? What's the what's the onboarding process?

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: What's the setup and customization process? So, I kind of want us to figure it out with my step with my father-in-law and um obviously I'll pay you for your time that you do on the

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: website and stuff. Um and then any work that you do setting up Atlas for his company I'll I'll pay you for. Um, but let's figure out like the best way to onboard clients for Atlas and and perfect that as we're helping my father-in-law because whatever he makes helps me too, right? You

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: know.

Wajid Ali Shah: We also right now we are working on the onboarding and user journey of uh Atlas as well the whole navigation and user journey how the user is going to navigate

MRE Consulting & Insurance: Yeah.

00:23:26

Wajid Ali Shah: through the platform because right now from what we started like the the version I gave you for uh that you are using on mci.te tech that was a very simple version, right? The new version is quite complex and it is going to take some time for anyone who is who doesn't really know how this stuff works to take it. It will take them some time to actually understand everything.

MRE Consulting & Insurance: Yeah.

Wajid Ali Shah: No. Uh, so yeah. So I'll I'll we can use your father-in-law to we test it ourself as So we are probably going to learn so many new things, so many things about Atlas itself while we are using for uh a newer business that we have no idea or Atlas it atlas itself does not have any uh context

MRE Consulting & Insurance: Yeah, for sure. I mean,

Wajid Ali Shah: about.

MRE Consulting & Insurance: and look, and the other thing is in regards to like helping people figure it out, especially in the the age of AI,

00:24:22

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: you can literally record your screen and it will document a video and give you a hard copy of a standard operating procedure list of how to do everything. So, if they were like, "How do I search for a lead?" They could watch the video. You know what I mean? Or

Wajid Ali Shah: Yeah, anyone signs signs up, we we we can send them uh list of helpful articles or helpful documents,

MRE Consulting & Insurance: Yeah,

Wajid Ali Shah: helpful helpful videos that they can use.

MRE Consulting & Insurance: we'll we'll basically have like a like a FAQ like you know frequently asked

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: questions and we'll have like a manual with some like standard processes that everybody might want to do and we can have videos or have a document showing how to do it. Um, so yeah.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So that that's what I'm thinking. But so yeah, so I'm really looking forward to starting August 1st.

00:25:22

MRE Consulting & Insurance: And then what I'm going to do is just so you know is August September 1st I'm going to do something in the beginning that I'm not going to do for a very long time but that I'm going to make some physical phone calls to just try to get more exposure, get a few more leads because if I can get us one or two clients, it takes the pressure for us.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: I might I might make some phone calls in addition to letting Atlas run.

Wajid Ali Shah: Sure.

MRE Consulting & Insurance: Um, and you know, like we'll obviously pick who I might call or whatever, but um yeah, but we should do that. And then uh yeah, and then we'll start live and then basically so I just signed a new partnership um with a CPA firm. Um, so they'll handle all the backend stuff for my accounting and tax and everything. So that'll be good. Um, and then, uh, yeah, and then MRE will be great and we'll be set up and, um, and be ready to go.

00:26:35

MRE Consulting & Insurance: So, um, yeah. So, that's pretty much it with Atlas. That's the AI system. Okay. Now the open claw and the the uh Mac studio.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: Um okay so you the rust desk is working right?

Wajid Ali Shah: Yeah. Yeah. It is working now.

MRE Consulting & Insurance: Okay. So, by the end of today, I'm going to have finished moving. So, I bought uh the the uh Thunderbolt 5 external hard drive uh enclosure so that way I can have it sit on there. Um, and I have it in uh two uh two two four terabytes in RAID one mirrored uh 2.7 and 1.3 and then uh 8 terabytes RAID zero. So that way we have 12 terabytes um and some of it's encrypted, some of it isn't. Um and it can be used for the whole um computer. And then we'll put the open claw and the um and the life management system.

00:27:47

MRE Consulting & Insurance: So I I've been working on the life management system, but the problem is sometimes the AI gets taken away and it starts adding all these features that I didn't tell it to add and then it becomes so much more complex than I meant it to be and then I'm trying to like walk it back. So, I'm trying to make it where it it only does the things that I need it to do um for right now.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: And it doesn't like it doesn't need like right now it was trying to like do business operations. I don't need it to do business operations. Like I just need it to determine if it's business,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: which business, save it, and then let me know what I need to do regarding it. But that's it. Like I don't need it to put it into QuickBooks or whatever. I just need to save the file.

00:28:35

MRE Consulting & Insurance: Tell me what it is and uh and what I need to do next. Like that's all. And then for personal, it's the same thing. Is it me? Is it my mom? Is it my fiancée? My dad, whoever is it for? Okay, good. Let's save the file, save the text, whatever. Put it on an updating to-do list. Okay. To-do for Matthew and blah blah blah. And like that's really I just needed to talk and and learn and to to basically help me manage my life, all my texts, messages, calls, businesses because I'm running so many businesses now and I'm running helping my family and we have so many products and I'm trying to keep it all, you know, together and there's just so much. So I I just need some help to like manage it and

00:29:22

Wajid Ali Shah: Yeah. Yeah. I'll have that.

MRE Consulting & Insurance: I think

Wajid Ali Shah: I think I should So, I should use the the document that you sent me yesterday,

MRE Consulting & Insurance: Yeah,

Wajid Ali Shah: right?

MRE Consulting & Insurance: I mean that that's that's pretty much it for the most part. I don't think that it needs to be anything more than that. If you have any questions, talk to me. I mean, look, realistically, here's what I want it to do. I want it to be on my local computer so it has access to the iCloud and the messages and everything. So that way it can read my emails, read my texts, it can get the the call transcripts of calls. And it can save all my emails, unsubscribe to spam, you know, uh tell me that an important email came and generate a reply for me to approve or change or send or whatever. Um just like very simple like basic automation life stuff.

00:30:17

MRE Consulting & Insurance: Like if I get pieces of mail, I could just take a picture and it will save it in in, you know, my mail folder and then tell me what I need to do, you know, the next thing. If it's jury duty, call by September 12th, whatever it is, you

Wajid Ali Shah: Yeah. Yeah. If you just share this uh meeting note with me and I'll I'll have I'll share this with the developer who is going

MRE Consulting & Insurance: know.

Wajid Ali Shah: to work on the open class stuff. Uh so that he has an overview of what you want.

MRE Consulting & Insurance: Yeah, I'll send you the transcripts and the meeting notes of this call and I'll try to put this into the LMS document project as well to see if it updates it. But like right now, I'm not trying to do anything super super complicated. I

really just want help managing my four businesses, the five people that I help, the texts, emails, calls, you know, there's just so much the social media profiles, the LinkedIn that there's just so much to manage that I could use some help with it.

00:31:21

MRE Consulting & Insurance: Um but yeah and then uh and then I I the

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: the Mac studio will definitely help us when we start uh testing and then you know running to help save money on local models. Right. So that'll be huge. Um are we going to start we're going to start testing from the beginning on the Mac Studio, right? Or are we going to test with the local AI?

Wajid Ali Shah: I think I think if we'll we'll the thing is I I've been searching uh on it right we can use the local model for the open cluster but if we are we need to be we need to make like the Mac Studio isn't really good enough for concurrent users, right? For connections and it's it's through it is through put

MRE Consulting & Insurance: Okay. Okay. So, we'll for the open claw,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: but but then we'll use the the traditional cloud models for Atlas.

00:32:18

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: Okay, that's fine. Now

Wajid Ali Shah: Yeah. Yeah, I'm also for a few features like uh meeting summary uh analysis and stuff like that.

MRE Consulting & Insurance: obviously

Wajid Ali Shah: Uh I think for the AI receptionist and atlas as well we I think we we are going to use something like deepseek because deepseek is is is pretty good like it has like 800 billion parameters and it is way way cheaper than uh anthropic and open air.

MRE Consulting & Insurance: yeah that's what I was going to say is the one thing is like you know anthropic and open AI are so expensive that it's like so much cheaper to use either Gemma Quinn um or Kimmy K or Deep Seek or Mini

Wajid Ali Shah: Yeah,

MRE Consulting & Insurance: Max

Wajid Ali Shah: we're only going to use open anthropic and open AI for the for the stuff that is that that needs them, right? The high priority and the complex

MRE Consulting & Insurance: and also also also Gemini and Grock for the social media, right?

00:33:19

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: Okay.

Wajid Ali Shah: Yeah. We are going to use we we will have to use gro for uh the X part of social media because it is so deeply integr integrated into the X algorithm. Now that we it will help us a

MRE Consulting & Insurance: Yeah. Yeah. And like I told you,

Wajid Ali Shah: lot.

MRE Consulting & Insurance: if we if Atlas works and it's smart and it looks at the previous days social media trends on X regarding our niche and then we post about things related to that, we will catch some some virality like you will catch some some flow of traffic, you know.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So that's why it's important about being strategic and seeing like what about what we do is trending or being asked or circulating or whatever

it may be because if we can post about it and draw eyes to it that's a potential lead you know or a follower or whatever.

00:34:30

MRE Consulting & Insurance: Um,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: okay. So, that's Open Claw. We did Atlas. Um, did the AI receptionist.

Wajid Ali Shah: Oh, okay. I am going to create a landing page on on atte uh and it will

MRE Consulting & Insurance: Um,

Wajid Ali Shah: have the redirect redirection links to all the services. It isn't going to be Alice itself, right? It it will be a landing page or a marketing page of sorts that will list all the services and then when uh a user clicks on uh any services that they want, they will be redirected to a subdomain uh within atlas.te that has all the details about uh that part particular product.

MRE Consulting & Insurance: Yeah. By the way, I was thinking about something. Tell me if you like this. What do you think about making Atlas meaning at T L E the name of the company, which it already is, and all our products.

00:35:35

MRE Consulting & Insurance: And then Atlas, the lead generator is called Atlas engine. The AI phone receptionist is called Atlas phone

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: receptionist. The lead enrichment system is called the Atlas ALES and the social media thing is called the Atlas social media poster. And basically just make it all Atlas, whatever. And make them all

Wajid Ali Shah: Yeah. Yeah, sure.

MRE Consulting & Insurance: Atlas.

Wajid Ali Shah: I mean, it makes sense. Like at least could be the brain behind everything and all of these are its limbs or or maybe something similar.

MRE Consulting & Insurance: Yeah, exactly. So maybe we make, you know, Atlas the main thing and then we have the engine,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: we have the phone, we have the CRM, we have the, you know, social media, whatever it may be.

Wajid Ali Shah: Yeah. So, I'll I'll use this uh as a as a blueprint for the website design.

00:36:36

MRE Consulting & Insurance: Yeah. And uh and yeah, and like I said, so I I think that we should um on MLE's website really talk about the AI phone receptionist and link it to that website. Um, and uh, and then everything else, you know, that we spoke about should be good. Um, and then I sent you some notes that my father-in-law sent me about some wording on MCAI's website. Um,

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: so if you can just make those little tweaks, that would be great.

Wajid Ali Shah: Yeah. I'll have that updated

MRE Consulting & Insurance: Um, thank you. And, um,

Wajid Ali Shah: tomorrow.

MRE Consulting & Insurance: yeah. And then so basically then oh the the last thing is so now that everything is going to be owned by my company Atlas which is a CC Corp and then it's everything's going to be licensed to my MRE consulting agency company. What I have to do is I'm creating an IP agreement with you and Nova Edge Solutions in which you agree that all of the IP related to all of the work done for me personally is obviously owned by Atlas, right?

00:37:56

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: And then uh any of the work done on behalf of my clients is initially owned by me in uh in um you know in uh in security for my client and then upon final payment we transfer ownership to the client. Right? So meaning meaning we we we never give up the ownership until they

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: pay.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: But um you know and then we then we give up the ownership when they pay and then it will just state that and we'll we can we'll do two separate agreements and then we'll just state that the Atlas stuff is all owned by the Atlas Corporation. um just so it can all be clean and uh

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: notated.

Wajid Ali Shah: Yeah. Yeah. Just send me the agreement and I'll sign and send it back to you.

MRE Consulting & Insurance: Okay, perfect. Um,

00:38:57

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: and then just dress, you know, The other reason that I uh I made the Atlas a uh C corp is because um that way an international person can have ownership in it.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: So So I made it so that way you can earn some ownership

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: in Atlas. So um that I did it that way too for you. So um yeah. So that that should all work.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: Um okay. So yeah, so that's pretty much it on everything. Um so regarding the open claw, I'll share this meeting notes with you and then um you're going to log into the computer and do whatever you have to do. Um how long do you think the open claw thing will take?

Wajid Ali Shah: Well, I'll try to have it completed in a week, right? So,

MRE Consulting & Insurance: Okay.

00:39:52

Wajid Ali Shah: seven days from now. Seven days, seven working days from now.

MRE Consulting & Insurance: Okay,

Wajid Ali Shah: Uh, but if it takes some time,

MRE Consulting & Insurance: perfect.

Wajid Ali Shah: I'll let you know.

MRE Consulting & Insurance: Okay, no problem.

Wajid Ali Shah: Yeah.

MRE Consulting & Insurance: And now what are we doing with the what are we doing with the open claw that's on the hostinger that I already paid

Wajid Ali Shah: You can just you can just remove it if you want.

MRE Consulting & Insurance: for?

Wajid Ali Shah: You don't have to pay for it.

MRE Consulting & Insurance: Okay. All right. I'll remove it.

Wajid Ali Shah: Yeah. Yeah.

MRE Consulting & Insurance: Okay.

Wajid Ali Shah: uh just send me the password for all the emails and uh if you still if you have any 2FA enabled on them please disable that uh so I don't have to you know uh just uh you know haggle you about uh the passwords and OTPs and

MRE Consulting & Insurance: Yeah.

00:40:36

MRE Consulting & Insurance: Yeah. So, I shut off two factor authentication.

Wajid Ali Shah: stuff

MRE Consulting & Insurance: I will send you the uh email passwords and everything today with the updated LMS after I finish uh moving everything over on the Mac Studio.

Wajid Ali Shah: Yeah. Yeah, sure. Thank

MRE Consulting & Insurance: I just I just wanted to talk to you about the the things that were more important, you know,

Wajid Ali Shah: you.

MRE Consulting & Insurance: like the the atlas and all that stuff. And then I will get you the the life management system. I'll get you the email and stuff for it, but like I know you're very busy and I'm not trying to say that, you know, the open calls are super important, you know, so you can take your time. I understand that. Um, you know, I just want us to do well in business and I'm really excited. So, um, yeah. So, basically that's what we'll do. Um, I will send you all of that stuff and then um and then we can touch base tomorrow and then we'll go from there.

Wajid Ali Shah: Yeah. Yeah, sure.

MRE Consulting & Insurance: Okay. Thank you, my friend. I appreciate it.

Wajid Ali Shah: Thank you as well. Have a good day. Bye-bye.

MRE Consulting & Insurance: You too. Bye-bye.

Wajid Ali Shah: Bye-bye.
